

Survey Crew Chief

Summary of Duties:

Survey Crew Chief to work in support of civil engineering and land surveying projects throughout South Carolina. The Survey Crew Chief will be responsible for the accurate and effective collection of survey data to be used in the preparation of plats and civil engineering design plans, and the overall management of the survey crew. Must have experience in route surveys, construction staking, traversing, boundary surveys, topographic surveys, control surveys, and other fundamental survey fieldwork. The applicant should be knowledgeable in operating conventional total station surveying equipment, survey grade RTK GPS equipment, Levels, Data Collectors, etc., and maintaining survey vehicles. This is an outdoor, field position. Sound physical condition is a must! The Survey Crew Chief reports directly to the Survey Manager. Pay will be based on experience.

Requirements:

An Associate's degree in engineering or surveying from an ABET-accredited curriculum or high school diploma with equivalent related experience is preferred. Experience working on civil engineering and land surveying projects is required. Must pass drug screening and background check. A valid Driver's license and transportation to work is required.

Responsibilities:

- Supervise a crew of workers engaged in various tasks related to GIS (Geographic Information System) and data analysis.
- Coordinate and assign daily work tasks to crew members.
- Ensure crew members follow safety protocols and adhere to project deadlines.
- Provide training and guidance to crew members on GIS software.
- Oversee the build and maintenance of GIS databases and systems.
- Conduct data analysis and generate reports based on project requirements.
- Collaborate with other departments to ensure accurate and timely data collection.

Qualifications:

- Proficient in GIS software, specifically ArcGIS.
- Strong technical skills in data analysis and interpretation.
- Previous experience in a supervisory role is preferred.
- Excellent communication and leadership skills.
- Detail-oriented with the ability to prioritize tasks effectively.
- Knowledge of robotics or automation systems is a plus.

This position offers an opportunity to lead a team of skilled workers in the field of GIS and data analysis. If you have a passion for technology, problem-solving, and team management, we encourage you to apply.

Benefits:

- Competitive Salaries
- Simple IRA with employer contribution
- Dental insurance
- Health insurance
- Life insurance
- Long term Disability
- Paid vacation time
- 8 Paid holidays

Job Type: Full-time

Salary: \$20.00 - \$25.00 per hour
